

A VIRTUAL CARE PLATFORM THAT STANDS OUT FROM THE REST

Bluestream Health's unique offerings differentiate it from low-end and high-end telehealth systems alike.

It allows Bluestream to be highly competitive in both the lower and higher end of markets.

|  <p>Low End</p> |  <p>Low to High End</p> |  <p>High End</p> |
|---|--|---|
| Adopted mostly by clinics | <ul style="list-style-type: none"> Adopted by clinics and health systems | Adopted mostly by large health systems |
| Some lack ease of use | <ul style="list-style-type: none"> Extreme ease of use for patient and provider | Lack ease of use |
| Only for provider to patient | <ul style="list-style-type: none"> For provider to patient and provider to provider | Only provider to patient |
| No integrated interpreting | <ul style="list-style-type: none"> Integrated interpreting and access to 200 languages | No integrated interpreting |
| Mostly a video conferencing solution | <ul style="list-style-type: none"> Customizable and flexible workflows | Most selling access to outside provider network |
| Workflows not customizable or flexible | <ul style="list-style-type: none"> Solution evolves with your practice | Workflows are rigid and complex to modify |
| Practice outgrows solution quickly | <ul style="list-style-type: none"> At scale is a 1/3 of cost of high-end providers | Becomes expensive at scale |
| Lack EMR integration or poor apps offered by EMR | <ul style="list-style-type: none"> EMR integration fast and inexpensive | EMR integration work is lengthy and expensive |
| Functionality limitations due to low cost | <ul style="list-style-type: none"> Weeks to deploy and lightweight resources required | Heavy and lengthy resource requirements to deploy |
| Does not scale for on demand and scheduled visits | <ul style="list-style-type: none"> Scales for on demand and scheduled visits | Does not scale for on demand and scheduled visits |

Unique Benefits

Low-cost

Choose between our range of robust solutions, with prices that can be tailored for any size organization. At scale, Bluestream is still **just one-third of the cost** of high-end telehealth providers and competitive with the lower end providers.

Complex Workflows Simplified

Bluestream supports a **full range of complex workflows** that can seamlessly integrate with your existing infrastructure for both on-demand and scheduled visits that can extend from triage to wound care, behavioral health, home health, and beyond.

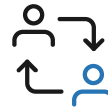

Integrated Interpreting

Bluestream features integrated interpreting that allows healthcare providers to leverage their own interpreter or industry-leading third-party language services. Healthcare providers can communicate with patients in **over 200 languages including American Sign Language.**

Quick, Low-resource Deployment

Our **easy-to-deploy solution** takes days, not weeks or months, to deploy and requires no hardware – no matter how complex your needs may be. With no apps, downloads or plug-ins required it's easy for provider or patient to use.

Quick, Open Interoperable Platform

We are an open interoperable, networked platform that is able to **connect your practice with other services** should you need them, including interpreters, behavioral specialists, or experts of other specialties to improve your care to your patient.

Virtual Visit That Rivals In-person

A provider to patient and provider to provider solution that delivers seamless in-video transitions to all clinical staff, healthcare providers, and specialists in the line of delivering care, including interpreters and family members.
